Advanced PCR Soft Gels With Curcumin

Our **Phytocannabinoid-Rich (PCR) Soft Gels with Curcumin** are created with our proprietary water-soluble PCR hemp oil. This product contains 25 mg of phytocannabinoids and 10 mg of curcumin per soft gel and is designed to have maximum absorption and optimum bioavailability. The patent-pending water-soluble formulation inside these soft gels is composed of a nanoemulsion-based delivery system with cannabinoid and curcumin emulsion droplets whose high surface area maximizes *in-vivo* absorption than their natural oily forms. The enhanced and consistent absorption, despite fed vs. fasting state, lead to predictable biological response leading to relief from pain and inflammation.
