

## PCR Vape

Our Phytocannabinoid-Rich (PCR) **Hemp Oil Vape** products are created with Vegetable Glycerin (VG) or MCT (derived from coconut) oil and have been designed to have accurate dosing with our 0.0% THC Broad Spectrum oil. Our extraction process utilizes the entire plant for a Broad Spectrum oil, containing all phytocannabinoids and terpenes naturally found in hemp.

### Active Ingredients

Phytocannabinoid-Rich (PCR) Hemp Oil  
(0.1 – 30%)

### Choose from the following bases:

- VG (vegetable glycerin)

*E. Coli* = Negative  
*Salmonella* = Negative

### Storage and Shelf Life

Keep at room temperature to preserve freshness. Store away from humidity, heat, and light. Expiration may vary based on the extent of customization.

\*For purposes of representations, Folium Biosciences, when speaking to the above terms, is defining every hemp oil batch as tested prior to release by its Quality Control Laboratory, employing a qualified test method based on HPLC – DAD (Diode-Array detector) equipment. Certificates of Internal Analysis are provided with each order confirming the absence of detectable THC from such equipment. Terms used not meant in the literal context. +/- ranges are associated with the testing equipment. FDA Disclaimer: Any statements made have not been evaluated by the Food and Drug Administration.
